EDUCATION

The LNM Institute of Information Technology

Jaipur, India

Bachelor of Technology, Mechanical Engineering

Expected May 2027

- Relevant Coursework: Data Structures & Algorithms, Object-Oriented Design, Operating Systems, DBMS, Computer Networks

EXPERIENCE

GAIL (India) Limited

May 2025 – Jul 2025

Summer Intern

Jaipur, India

- Designed and developed a Flask-based intranet portal hosted on the office's local server, enabling secure document sharing and structured asset tracking
- Added activity logging for file uploads, edits, and deletions; deployed via internal network ensuring complete data confidentiality and offline accessibility
- Added structured activity logging for uploads, edits, and deletions.

PROJECTS

LNMIIT Carpool | *Node.js, Express, Socket.IO, Redis, React Native, Docker, Nginx* | [GitHub](#)

2025

- Built a full-stack carpool platform for LNMIIT students — Node.js + Express backend, React Native mobile app, real-time ride-matching via Socket.IO; designed for 10–15k users, 5k concurrent connections
- Achieved <200ms response times using Redis caching and Supabase connection pooling; scaled to 5k+ concurrent socket connections via Redis adapter across multi-instance deployment
- Containerized with Docker, load-balanced with Nginx, deployed on Railway/DigitalOcean — targeting 99.9% uptime with health checks and automatic failover

Medi-Bot: Post-Discharge Medical AI Assistant | *Python, LangChain, FastAPI, , HuggingFace* | [GitHub](#)

2025

- Built a multi-agent medical AI system — Receptionist agent handles patient lookup and routing, Clinical agent answers medication and discharge queries using RAG over a nephrology knowledge base
- Implemented full RAG pipeline: PDF ingestion, chunking, HuggingFace embedding (all-MiniLM-L6-v2), ChromaDB vector storage; tuned chunk size and overlap to improve retrieval accuracy
- Exposed via FastAPI with Pydantic-validated endpoints and Streamlit UI; integrated optional SerpAPI web search for real-time medical information

CODING PROFILES

CodeChef: 2-Star, 160+ problems solved (Max Rating: 1437) – [Profile Link](#)

LeetCode: (120+ problems solved) (Max Rating: 1490) – [Profile Link](#)

GFG: (220+ problems solved) (Coding Score : 727) – [Profile Link](#)

TECHNICAL SKILLS

Languages: C/C++, Python, Java, JavaScript, HTML/CSS, SQL

Frameworks & Libraries: Node.js, Express, Flask, React Native, Socket.IO

Databases & Infrastructure: Redis, Supabase (PostgreSQL), Docker, Nginx

Tools & Environments: Git, GitHub, Linux

CS Fundamentals: Data Structures & Algorithms, Object-Oriented Design, Operating Systems, DBMS, Computer Networks
